

PROMOTING HEALTH LIVING GROUP UPDATE – DECEMBER 2016

The 'Promoting Healthy Living Group' met on 5 December. At this meeting the Terms of Reference for the Group, including the membership and frequency of the meetings were agreed.

A draft Action Plan was discussed to take forward actions for each of the six priority areas identified and the overall management of the Action Plan. It was agreed that there would be a lead officer for each of the priority areas and leads were agreed. These lead officers would coordinate and facilitate appropriate action for each of the areas. There was also a general discussion about the scope of some of the specific areas. For example, that workforce health should cover internal workforce health for HWB partners as well as the working well programme, with links to be made to private, public and other sectors.
